What is Sanako Connect?

Sanako Connect is a complete language teaching software offering everything language educators need to run live or asynchronous classes in the classroom and remotely. All teaching modes and your specialist language teaching activities are now all available in one ultimate language teaching hub that is accessible via the internet using any device.

Sanako Connect is purposely designed for all languages and all language teachers covering English and Foreign language teaching. It is also developed following the highest standards in web accessibility guidelines to be accessible also for students with disabilities like visual impairments.

- **Accessible from anywhere using any combination of devices and operating systems, including desktop computers, laptops, Chromebooks, Macs, tablets and smartphones.**

- **No login details needed for the students, students join via a unique web-link (no data privacy issues).**

- **Create learning materials and share them with your students and teacher colleagues. All files and materials are stored in a secure cloud-based system.**

- **Combines all the benefits from physical language laboratories, virtual meeting solutions, and dedicated language learning tools all into one easy-to-use software.**

- **Includes all the teaching tools needed for scaffolding student learning - all the way from digital flashcards and automated pronunciation grading to specialist recording activities that help develop spontaneous speaking skills.**

How **Sanako** Connect helps language teachers, students, and language departments?

Easy to manage and **hassle-free for the school IT department** because it's a scalable browser-based solution with concurrent user licensing. Usable at a class level, at a teacher level, at a school level, or even at a district level.

Helps students to **increase their English and foreign language skills, grades, and oral language proficiency.** Enables important self-evaluation by allowing students to listen back to their own speech and recordings.

Helps language departments to excel compared to other institutions and departments. **Practice and administer speaking exams and oral language assessments** with teacher-controlled exercises.

Sanako Connect's Most Popular Language Teaching Features

Sanako Connect is a new generation product for modern language teachers. This highly accessible and flexible tool is fast and easy to use, yet offers the most sophisticated features for teaching any language in the classroom or remotely.

Here are just some of the most notable and popular features and benefits of Sanako Connect:

Digital Flashcards

Digital Flashcards help your students to memorize vocabulary and practice for exams. Flashcards are a great tool to help students get familiar with new vocabulary. As a starter activity, flashcards help your students to be prepared for more demanding tasks that use the same vocabulary. You can add your flashcards as a part of multipart exercise or just share them as their own.

Automated Pronunciation Grading

This feature allows teachers to turn any text material into authentic spoken language (support for most modern languages) and into an interactive pronunciation task. Students listen to the example phrase and then record themselves saying the same phrase to compare with the original model. Students then receive automated feedback and scoring.

Interactive Audio and Video Tasks

Students can interact with any audio or video file using their voice. This is one of the most unique features of Sanako Connect. Our dedicated recording feature for language teaching allows you to take any existing audio or video file and have your students use our two-track recording function to interact with the original material. The most common use cases for this feature are consecutive and simultaneous interpreting, video interviews, and spontaneous speaking practice.

Live and Asynchronous Teaching

Sanako Connect helps you to optimize teaching time by enabling you to deliver live instructions, self-paced learning, and homework all in the same platform. With Sanako Connect you can use all of your lesson materials and exercises either in live lesson mode or to have your students practice on their own. All students' submissions and recordings are automatically saved and available for feedback in the same platform.
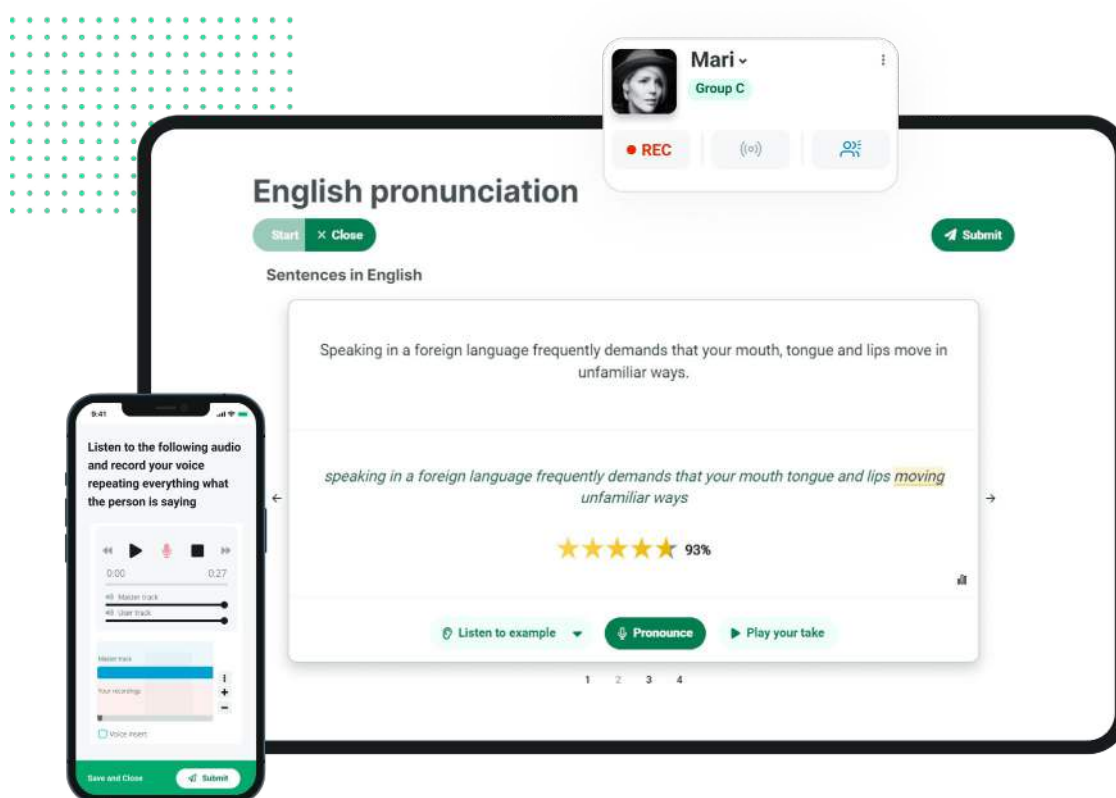

Live Group Discussion and Role-Play

Add students to pairs or groups based on ability or shuffle random groups to practice live discussion and role-plays. Dividing students into live pairs or groups allows them to have more time for speaking practice. Similarly to breakout rooms, you can switch between groups to monitor them or join the discussion. You can easily see the groups from your teacher's view and provide immediate feedback.

Practice and administer speaking exams

Sanako Connect makes it easy to administer oral assessments and practice for high stakes exams like the World Languages AP® Exam or IELTS. With Sanako Connect you can record individual students simultaneously and collect back these recordings automatically. You can create speaking and listening exams with special features which limit the time students can record and also limit their navigation inside the solution when they are completing the exam.

Fact sheet:

- **Sanako Connect is a web-based software application so it works on all operating systems and you only need an internet connection to run it**

- **It is most suitable for learners from age 14+ onwards**

- **It is highly popular among high schools and universities**

- **It can be used in all teaching modes including face-to-face classroom teaching, remote and hybrid teaching**

- **It can be used in real-time live classes as well as for self-paced asynchronous language learning**

- **Can be used to teach any language**

- **Available subscription lengths: 12 month, 3 year or 5 year contract (Save money by choosing a 3 or 5 year contract!)**

- **Available concurrent user packages: starting from 15 concurrent student users up to unlimited users.**

What do language teachers say about Sanako Connect?

"

Sanako Connect helps to optimize our teaching time! With this tool we now can supervise student activities better; both when students are working together and while learning alone. Using the Sanako Connect platform also enables our teachers to optimize the time spent in class with students. And it allows us to engage more students than is possible in a normal classroom.

Yrama Lander Lopez,
English Language instructor,
The Mediazione Linguistica Perugia, Italy

"

I really like the product! I've used Sanako solutions in our school's language lab and now online as well. I find the different possibilities for creating exercises very useful.
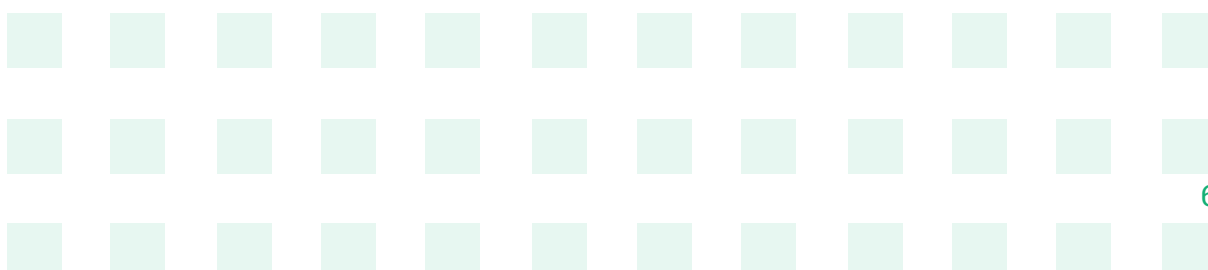

Susanne Renette,
English instructor,
Koblenz, Germany

"

Classes can now be either synchronous – we can talk to all the students in real-time using a microphone or on a global chat, or to individual students via a microphone or a direct message – or asynchronous allowing students to practice at their own pace and submit their work for a teacher to check.

Dr. Marta Nowacka,
Assistant Professor in the College of Humanities,
The University of Rzeszów, Poland

" *This is a tremendously valuable tool to track the students' progress, but also to provide a secure method of assessment, either on site or online. Additionally, if working online, the students have the ability to work in either synchronous or asynchronous mode making it extremely flexible for the busy tutor and student.*

Zoé Brill Diderich,
Lecturer in Interpreting
University of Westminster, UK

" *We remain delighted in using Sanako's software as the positive impact on progress and student confidence is clear.*

Jill Snook,
Faculty Leader for International Languages
Monmouth Comprehensive School, UK

" *It's really great that Sanako Connect works over the internet and on any devices and yet still offers all the benefits from classroom-based language lab systems. I can easily pair up students or create group discussion sessions and then record all of those discussions for feedback and review. Sanako's customer support team is very reactive and helpful if we have any questions.*

Shawn Beatty,
Japanese teacher,
Columbia Missouri, USA
